INFORMATION PROTECTION & COPILOT READINESS

Copilot can already read everything your people can.

Why this matters

Sensitive information leaks externally through accidental sharing and internally through broad or outdated access. Copilot raises the stakes and surfaces anything a user can already reach.

Get ready before your data gets exposed.

Start a focused engagement to design and implement a practical protection baseline with **Purview Sensitivity Labels and Data Leak Protection built for Copilot readiness.**

Book a discovery session today.

The Kinetics service

Protect internally

- Find oversharing risk
- Clarify who sees what
- Shield HR, legal, finance

Protect externally

- Stop accidental disclosure
- Control external sharing
- Encrypt what matters

Prepare for Copilot

- Classify grounding data
- Fix permission risk
- Govern AI interactions

Secure your information. Protect collaboration. Enable AI with confidence.

INFORMATION PROTECTION & COPILOT READINESS

$2,320
EXCL. GST

A fixed-price start to information protection.

01 Discovery & design workshop
Priority information, risk scenarios, licensing, success criteria.

02 Sensitivity label framework
Four labels including a clear Highly Confidential tier.

03 DLP policy configuration
One policy protecting Highly Confidential content across Microsoft 365.

04 Pilot, test & tune
Controlled rollout, real test scenarios, fast issue resolution.

05 Guidance & handover
Admin documentation, user guidance, handover session.

Optional Next Steps
- Monthly policy tuning
- Oversharing and permissions remediation
- Copilot and security posture review
- Custom sensitive data types classification
- Adoption and refresher training
- Information governance and records management

Why it pays off
- ✓ **Copilot becomes safer** sensitive content is classified before it gets surfaced
- ✓ **Oversharing stops spreading** external sharing and stale access are brought under control
- ✓ **Proof you can show** labels, policies and reporting that stand up to audits and insurers
- ✓ **No open-ended project** one price, weeks not quarters, clear scope boundaries
- ✓ **A foundation, not a one-off** labels and policies you extend as risk grows

Important to Note:
- Licensing not included; confirmed at discovery
- Permission clean-up is scoped separately
- Endpoint DLP, records, insider risk are optional add-ons
- Encryption, B2B, regulatory may add scope

Secure your information. Protect collaboration. Enable AI with confidence.
